## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 12 recites a composition that is "obtainable" by the process of instant claim 6. It is unclear what other process(es) applicants are intending to include by use of the word, obtainable. Also, it is unclear if the composition is intended to include the catalyst of the present invention. If so, the examiner suggests amending the claim such that the catalyst is included in the claim language. Claims 13-16 depend from claim 12 and therefore are likewise rejected.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 12 and 16 are rejected under 35 U.S.C. 102(a) as being anticipated by Kaizik et al (US 6,627,782).

Kaizik et al disclose a composition that comprises 1-octene at above 90% by mass (col. 7, table 4). If the product in the product-by-process claim is the same as or obvious

from product or process of the prior art, the claim is unpatentable even though the prior product was made by a different process; *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). Accordingly, Kaizik et al anticipate the instant claims.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-15 are rejected under 35 U.S.C. 103(a) as being obvious over Kaizik et al.

The instant claims are drawn to a process for preparing aldehydes and/or alcohols by hydroformylation of the olefin in the composition of claim 12, the alcohol being a plasticizer alcohol, and the alcohol being isononanol.

Kaizik et al is not drawn to a hydroformylation reaction; however, hydroformylation reactions using linear olefins, such as octene are well documented in the art. It therefore would have been obvious to a person having ordinary skill in the art that the octane-containing composition taught by Kaizik et al may be used as feed for a hydroformylation reaction. The production of isononanol (an alcohol having utility as a plasticizer) would have been obvious as well.

Art Unit: 1621

***Allowable Subject Matter***

The following is a statement of reasons for the indication of allowable subject matter: claims 1-11 are drawn to a catalyst not taught by the closest prior art and to a method of using said catalyst.
